

Compliance Automation Blueprint

Become audit-ready every day, without drowning in admin.

EXECUTIVE SUMMARY

Regulated industries don't get second chances.

Brokers, accountants, NDIS providers, and finance professionals face:

- Strict compliance rules
- Document burden
- High audit risk
- Admin bottlenecks
- Escalating privacy/security expectations

This blueprint helps you automate compliance, reduce human error risk, and scale client delivery confidently.

1. THE COMPLIANCE PAIN POINT

The truth:

Most compliance breaches don't happen from malicious intent, they happen from manual systems breaking at scale.

Symptoms:

- Chasing clients for documents
- Disconnected folders and email trails
- Missing expiry reminders (IDs, licenses, docs)
- No auditable workflow logs
- Last-minute audit panic

Audit fear is not a workflow strategy.

Automation is.

Compliance Automation Blueprint

Become audit-ready every day, without drowning in admin.

2. COMPLIANCE MATURITY MODEL

Category	1	2	3	4	5
Client doc collection	Adhoc	Manual forms	50% Automated	Automated + reminders	Fully automated + verified
Document storage	Inbox chaos	Folders	Drive structure	Encrypted structured	Encrypted + Role-based + logs
Audit trails	None	Email trail	CRM Notes	Structured logs	Automated logs + Monitoring
Expiry management	None	Manual	Reminders	Automated alerts	Automated chase workflows
Security controls	None	Passwords	Basic MFA	Restricted folders	Audit-grade layered security

Total Score Guide

23+ = Audit-ready Automation

15-22 = Process but manual

<15 = Fire-fighting mode

3. GOLDEN RULE FRAMEWORK

Stage Automation Example

Collect	Secure upload link in welcome email
Verify	AI checks doc completeness + ID match alerts
Store	GDrive secure folder auto-creation
Track	GHL tags + reminders for expiry
Report	Audit log export available anytime

Compliance Automation Blueprint

Become audit-ready every day, without drowning in admin.

4. CORE COMPLIANCE AUTOMATION SETUP

Key automations to deploy:

Workflow	Tool	Result
Secure onboarding	GHL + Secure Drive Folders	Nothing lost in inboxes
ID/Doc Expiry Alerts	GHL Workflows	Zero lapses
Client Reminders	SMS + Email Automation	No manual chasing
Staff Reminders	GHL Tasks	Internal Accountability
Data access controls	Google Workspace admin	Internal Risk Reduced
AI doc screening	AI + drive watch	Faster Review, Fewer errors

If you can't audit it, you can't protect it.

5. PLUG-AND-PLAY SCRIPTS

Client Doc Reminder

Hi {name}, to progress your file, please upload the required doc here:
{securelink}

If you have questions or need support, I'm here to help 😊

Invoice Reminder

⚠ Compliance task due for {client}
Please update documents and mark verified.

Compliance Automation Blueprint

Become audit-ready every day, without drowning in admin.

6. AUDIT-READY CHECKLIST

- | | |
|---|---|
| ☐ Secure Uploads | ☐ Automated doc expiry checks |
| ☐ MFA enabled | ☐ Client reminder workflows |
| ☐ Role-based access | ☐ Compliance SOP stored in Drive |
| ☐ Audit logs enabled | ☐ Quarterly audit review |

7. 30-DAY SOLO SYSTEM PLAN

- Week 1** Map documents & build secure folder structure
- Week 2** Launch upload + reminder system
- Week 3** Create expiry + audit workflows
- Week 4** Add AI document assist + quarterly review cadence

Want a compliant automation system built for you?

- ✓ Document Automation
- ✓ Audit-ready workflows
- ✓ Secure storage & access controls
- ✓ AI document assistant
